ADDITIONAL SA-2 SAM SITES  
WITH ASSOCIATED LARGE REVETMENTS, USSR

This report supplements NPIC report R-362/63, SA-2 SAM Sites with Associated Large Revetments, USSR. 1/ Details are presented herein on four additional sites which have been identified: Kaliningrad SAM Site B02-2, Kaliningrad SAM Site B28-2, Jelgava SAM Site

C25-2, and Postavy MRBM Complex SAM Site C22-2 (Figure 1).

No buildings similar to those found at known nuclear storage installations can be identified at any of the four sites.

KALININGRAD SAM SITE B02-2

25X1A

This site, [REDACTED] is located at 54-53-20N 20-33-25E, 11 nautical miles (nm) north-northeast of Kaliningrad. Two large revetments, one generally rectangular and one generally square, are located adjacent to the site (Figure 2). Construction appears to have started in [REDACTED]. One revetment, approximately 85 by 60 feet, is located west-northwest of the site and 480 feet from the site center. The other, approximately 70 by 70 feet, is located south-southeast of the site and approxi-

mately 515 feet from the site center. Both revetments appear to be drive-through and possibly connected to the site perimeter road.

The possible site support area is located north-northeast of the site.

25X1D

The nearest SA-2 site with similar large revetments is Kaliningrad SAM Site B28-2, which is 22.5 nm to the west-southwest. The nearest SA-3 site is Kaliningrad SAM Site B07-3, located immediately north approximately 0.5 nm from the site.

KALININGRAD SAM SITE B28-2

25X1A

This site, [REDACTED] is located at 54-43-58N 19-58-00E, 18 nm west of Kaliningrad. Two large, generally rectangular revetments located adjacent to the site (Figure 3) were identified on KEYHOLE photography of [REDACTED]. One revetment, approximately 85 by 65 feet, is located south of the site and 520 feet from the site center. The other, approximately 100 by 65 feet, is located north of the site and 590 feet from the site center. Both revetments appear to be drive-through; it cannot

be determined whether they are connected to the site perimeter road.

The site support area is located north-northeast of the site. No changes in the area had taken place by [REDACTED] coverage.

25X1D

25X1D

The nearest SA-2 site with similar large revetments is Kaliningrad SAM Site B02-2, which is 22.5 nm to the east-northeast. The nearest SA-3 site is Kaliningrad SAM Site C27-3, which is 4.7 nm to the south.

25X1D

JELGAVA SAM SITE C25-2

25X1A

This site, [REDACTED] is located at 56-29-20N 23-02-40E, 25 nm west of Jelgava.

Three large, generally rectangular revetments located adjacent to the site (Figure 4) were

25X1D identified on KEYHOLE photography of [REDACTED]. Each is approximately 100 by 90 feet. One is located west of the site and 525 feet from the site center; one is north of the site and 545 feet from the site center; and the third is south-southeast of the site, 570 feet from the site center. All three revetments are drive-through and served by roads from the site perimeter road. The revetments are situated where missile-hold revetments normally are found, and it is possible that they are being

used for that purpose.

There are possibly two areas used for site support. One area is west of the site and contains two large barracks-type buildings. The other is southeast of the site and contains seven smaller barracks-type buildings.

The nearest SA-2 site with similar large revetments is Riga SAM Site B03-2, which is 55 nm to the northeast. The nearest SA-3 site is Liepaja SAM Site A19-3, located 68 nm to the west.

#### POSTAVY MRBM COMPLEX SAM SITE C22-2

25X1A This site, [REDACTED] is located at 54-54-20N 26-26-40E, 22 nm southwest of Postavy MRBM Complex. Two large rectangular revetments located adjacent to the site (Figure 5) were first identified on small-format photography of [REDACTED]; they were seen again on KEYHOLE photography of [REDACTED]. One, 90 by 60 feet, is [REDACTED] feet south-southeast of the center of the site. The other revetment, 85 by 65 feet, is 555 feet southwest of the center

of the site.

The presence of a site support area cannot be confirmed; however, there are scattered buildings in the area of the site that could serve this purpose.

The nearest SA-2 site with similar large revetments is Lida SAM Site C29-2, located 78 nm to the south-southwest. The nearest SA-3 site is Lida SAM Site C29-3, which is collocated with Lida C29-2.
